Mr. Fouad Dababneh  
U.S. EPA Region 5, SR-6J  
77 W. Jackson Boulevard  
Chicago, IL 60604

Reference: EPA Contract No. 68-W-00-083; EPA Task Order No. 083-024; Region V  
Generic Potentially Responsible Party (PRP) Search, BiState PRP Documents  
Review, Task 8; FY04-016.

Dear Mr. Dababneh:

TechLaw was tasked by U.S. EPA to review and organize corporate records relating to CAM-OR, Inc. or its divisions. These records were obtained from a public storage facility in Indianapolis, Indiana. From November 1<sup>st</sup> through 5<sup>th</sup>, TechLaw staff accompanied and assisted U.S. EPA employees in evaluating over 600 boxes of records, selecting those which appeared to contain relevant information. Approximately 48 boxes were transported to the TechLaw office for further evaluation, disposal or organization.

As requested by Mr. Lance Vleck in an email dated November 9, 2004, the records were organized into the following categories: Employee Records, Firm Received Records, Waste Disposed Records, Site Related Records, Bankruptcy Records, Insurance Records, Business Correspondence, and Miscellaneous Files. Records verified as irrelevant were disposed, unless they contained sensitive information requiring shredding (e.g., personnel injury claims, personal income tax information). TechLaw will shred sensitive materials upon U.S. EPA approval. As a result of the review and reorganization 20 boxes of records remain, with most records being specific to U.S. EPA Region 5. There are three additional boxes designated for shipment to U.S. EPA Region 6 which relate to CAM-OR of Texas, Inc. A brief discussion of file categories is presented below, including types of records within each category and how they are organized. Additionally, lists of documents in the various categories are provided in both hard copy and electronic format.

Mr. Fouad Dababneh

December 22, 2004

Page 2

- Employee Records consist of Employment Applications, resumes, employee reference checks, and other employee related file material. Many of the CAM-OR, Inc. employee files were already placed within folders. These employee files were organized alphabetically by employee name by TechLaw. Any loose applications were separated, and placed at the end of the Employee Records file material. Enclosed is an Employee Records Outline Report listing the file material contained within the six boxes of Employee Records.
- Firm Received Records consist primarily of invoices and waste tickets documenting the pickup of waste oil by CAM-OR, Inc. (or one of its divisions) from companies/entities within Indiana, Illinois, Michigan, Minnesota, Ohio, and non-U.S. EPA Region 5 states. Firm Received Records pertaining to companies within Indiana were organized by site name and county. Firm Received Records pertaining to other states were organized by state or U.S. EPA region. Enclosed is a Firm Received Records Outline Report listing the contents of the three boxes of Firm Received Records. The Firm Received Records Outline Report also includes a listing of the Indiana Firm Received Records by company name and Indiana county.

It should be noted that generally only Indiana companies/entities with more than three waste tickets or quantities exceeding 1000 gallons of waste oil were filed by site name. Companies with three or less waste tickets (or conferred less than 1000 gallons of waste oil to CAM-OR, Inc.) are filed alphabetically in order of Indiana company name within the Indiana Firm Received Miscellaneous File.

- Waste Disposed Records consist primarily of invoices and waste tickets documenting the delivery or disposal of waste oil by CAM-OR, Inc. (or one of its divisions) from companies within Indiana, Illinois, Michigan, and Ohio. Waste Disposed Records were organized in exactly the same manner as the Firm Received Records. Enclosed is a Waste Disposed Records Outline Report listing the contents of the two boxes of Waste Disposed Records. The Waste Disposed Records Outline Report also includes a listing of Indiana Waste Disposed Records by company name and Indiana county.
- Files were considered Site Related Records if they pertained to companies identified in previously submitted title reports such as those for the Bi-State Products Site, I-Gurman and Sons Site, Illada Site, Brown Landfill/Yard 520 Site, Lawrence Dump Site, and Pines Landfill Site. Enclosed is a Site Related Records Outline Report listing the file material contained within the one-half box of Site Related Records.

Mr. Fouad Dababneh

December 22, 2004

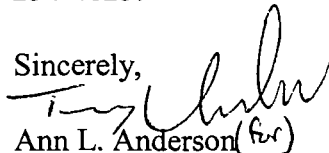

Page 3

- Bankruptcy Records and Insurance Records are filed within one box. Bankruptcy Records consist primarily of any correspondence or legal paperwork pertaining to the bankruptcy of CAM-OR, Inc. or those companies where CAM-OR, Inc. was a creditor. Insurance Records consist of general insurance coverage information as well as environmental insurance. Enclosed are a Bankruptcy Records Outline Report and an Insurance Records Outline Report listing the contents of one box of Bankruptcy Records and Insurance Records.
- Business Correspondence consists primarily of business agreement letters, inter-office memos, and letters to/from various companies/entities. Enclosed is a Business Correspondence Outline Report listing the file material contained in the one box of Business Correspondence.

All other file material not suitable for any of the above categories were filed together in the Miscellaneous Files. The Miscellaneous Files encompass a wide range of file material including, but not limited to, accounting documents, company operations information, corporate records, miscellaneous personnel files, company legal information, and real estate documentation. Enclosed is a Miscellaneous Files Outline Report listing the contents of the six boxes of Miscellaneous Files.

Twenty file boxes of original CAM-OR, Inc. (or its divisions) records are delivered to U.S. EPA as an enclosure to this deliverable. No additional copies of the records have been made. TechLaw awaits final instructions concerning the three boxes of materials designated for U.S. EPA Region 6, as it appears more cost-effective to ship directly to Texas rather than through U.S. EPA Region 5.

Please feel free to call me if you have any questions. I can be reached at (312) 345-8921 or (847) 234-4823.

Sincerely,  
  
Ann L. Anderson (for)

TechLaw Task Order Manager

## **Waste Disposed Records Outline Report**

### **CAM-OR, Inc. File Review**

#### **Box WD1**

**Contains:** Indiana waste disposed records for companies A-R.  
84 Lumber Company to Running T Camping  
(See waste disposed company listing)

#### **Box WD2**

**Contains:** Indiana waste disposed records for companies S-Z.  
S & H Campground to Zimmer Paper Products Company  
(See waste disposed company listing)

Miscellaneous waste disposed records for companies with less than four waste received tickets or small quantities (less than 1000 gallons). Companies are in alphabetical order.

State of Indiana Stream Pollution Control Board Waste Removal Record Hauler Report, dated June 1976, which lists the source of the waste removed, location of disposal, and method of disposal. It should be noted that the Waste Removal Record Hauler Report indicates that used crankcase oil was used for dust control.

Waste disposed records for companies located in Illinois, Ohio, and Michigan.
